

# INSTRUCTIONS

[www.gullbuster.com](http://www.gullbuster.com)

»»» For the end of the season

1. Loosen small set screws on each bracket.
2. Take lakeside poles out of brackets, slide across canopy to dockside.
3. Take out dockside poles, keeping poles in front together and poles in rear together.
4. Gather lines together in center, then bring all poles together, winding line around them.
5. Use velcro straps to wrap lines and poles.

# GET IN THE BIRD-FREE ZONE

*It is possible to leave the GullBuster™ Canopy System up! Just slide the canopy off, starting at the lakeside and roll it over, roll the front and back to the middle and slide the canopy out between the dockside poles. Using the large adjustment screws to raise the poles will make this easier. Reverse the process in the spring and you're ready for another season of watching the seagulls on your neighbor's lift!*

# INSTALLATION
